

## Lab 3

### CSS Grid

#### DESCRIPTION

Attempt to recreate the below layout using CSS Grid properties and values.

#### INSTRUCTIONS

- **STEP 1:** Open the provided HTML file and examine the code.
- **STEP 2:** Look at the illustration below and build out the grid rows and columns using an appropriate CSS selector and declaration for the grid container.
- **STEP 3:** Inside the above rule, specify the content areas for each of the sections as they appear in the below illustration – watch for merged cells on the grid.
- **STEP 4:** Associate each of the grid items with the appropriate grid template areas, and set a background color that resembles the illustration below.
- **STEP 5:** Add a little bit of gutter space between the grid rows and columns.
